

DOE/EIA-0218(85/46)
Distribution Category UC-98

Weekly Coal Production

Energy Information Administration
Washington, D C

Production for Week Ended:
November 16, 1985

Highlights

U.S. coal production in the week ended November 16, 1985, as estimated by the Energy Information Administration, totaled 16.72 million tons (bituminous coal and lignite, 16.65 million tons; Pennsylvania anthracite .08 million tons). This was 1.2 percent higher than the previous week, and was 11.8 percent higher than production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through November 16, 1985 was estimated at 783.79 million tons, 2.7 percent below the 805.17 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
